

The EEO data made available by Census Occupational Categories was not made available for each individual county as was seen in previous censuses. Utah's largest counties were represented individually, but the state's remaining counties were grouped together. Census 2000 Special EEO Tabulation provide data only for counties of 50,000 or more. Counties of less than 50,000 were merged with other counties to form County Sets. <http://www.census.gov/hhes/www/eeoindex/classifications.html>
